Federal Communications Commission
Office of Secretary

In the Matter of

**Amendment of Section 73.202(b),
Table of Allotments,
FM Broadcast Stations
(Bairoil and Sinclair, Wyoming).**

**DOCKET FILE COPY ORIGINAL
MB Docket No. 05-177**

**TO: Marlene H. Dortch, Secretary, Federal Communications Commission, Office of the
Secretary
ATTN: Assistant Chief, Audio Division, Media Bureau**

COMMENTS AND COUNTERPROPOSAL

Michael Radio Group ("Michael"), permittee of Station KGRK(FM), Glenrock, Wyoming, and White Park Broadcasting, Inc. ("White Park"), permittee of Station KTED(FM), Douglas, Wyoming (collectively referred to herein as "W&M"), jointly submit these Comments and Counterproposal in the above referenced proceeding, *Notice of Proposed Rulemaking*, DA 05-1151, released April 27, 2005. Specifically, the Counterproposal contained herein will result in the upgrade of two stations, one from a Class C2 to a C and the other from a Class A to a Class C1. Further, the Counterproposal contained herein contemplates for KTED the substitution of Channel 251C for 265C2 as well as a change of community of license from Douglas, Wyoming to Bar Nunn, Wyoming. This will allow the substitution, as well as the upgrade of KGRK, Glenrock, Wyoming, from Channel 252A to 265C1. The Counterproposal contained herein also proposes improved service by substitution of Channel 253C2 for Channel 235A in Bairoil, Wyoming as currently proposed.

Number of Copies rec'd 054
DATE 6/20/05

In the *Notice of Proposed Rulemaking*, the Commission on its own motion proposes the substitution of Channel 235A for Channel 265A at Bairoil, Wyoming and the substitution of Channel 267C for Channel 262C at Sinclair, Wyoming. In the Counterproposal contained herein, W&M propose the following changes to the Table of Allotments:

COMMUNITY	PRESENT	PROPOSED
Douglas, WY	223C1, 257A, 265C2	223C1, 257A
Bar Nunn, WY	-----	251C
Bairoil, WY	265A	253C2
Glenrock, WY	252A	265C1
Sinclair, WY	262C	267C

Grant of the requested channel reallocations will result in a preferential arrangement of allotments as provided in the Commission's change of community procedures. The requested reallocation of Channel 265C2 in Douglas to Bar Nunn on Channel 251C will provide a first local transmission service to Bar Nunn, Wyoming and increase the population served from 74,684 within KTED's current 1mV/m contour to over 78,081, a gain of 3,397. *See, Amendment of the Commission's Rules Regarding Modification of FM and TV Authorizations to Specify a New Community of License*, 4 FCC Rcd 4870 (1989), *reconsideration granted in part, denied in part*, 5 FCC Rcd 7094 (1990).

The Commission must determine whether W&M's "proposed amendments to the FM Table Allotments is in the public interest and is in accord with [the Commission's] statutory mandate to 'make such distributions of licenses and frequencies . . . among the several States and communities as to provide a fair, efficient, and equitable distribution of radio services to each of

the same.” *Parker & Port St. Joe, FL*, 11 FCC Rcd 1095 (1995); *quoting* 47 USC §307(b). In making this determination, the Commission must “compare the proposed allotment plan to the existing state of the allotments for the communities involved. If the proposed allotment plan would result in a net service benefit for the communities involved (that is, if the plan would result in a preferential arrangement of allotments) [the Commission] will adopt the proposal.” *Memorandum Opinion & Order on Rules Requiring new Community of License*, 4 FCC Rcd at 4873. In assessing the proposed allotment plan, “[t]he Commission seeks to provide in order of priority: (1) first full-time aural reception service; (2) second full-time aural reception service; (3) first local transmission service; and (4) other public interest factors. Co-equal weight is given to priorities (2) and (3).” *Id* at 4873 & n.8; *Faye & Richard Tuck, Inc.*, 3 FCC Rcd 5374, 5376 (1988).

The Counterproposal contained herein should be adopted because it will provide Bar Nunn, Wyoming with its first local transmission service. In carrying out its Section 307(b) duties, the Commission should “presume that every separate community needs at least one local transmission service.” *Parker supra* at 1095.

The proposed change for KTED will not cause Douglas, Wyoming to lose its only local transmission service. Douglas has been and will continue to be well-served by two FM and one full-time AM transmission service already licensed to Douglas.¹ Therefore, even with the KTED change in community of license to Bar Nunn, there will remain three operating stations providing transmission service to Douglas, Wyoming. The community will also be served by five or more stations, which is considered well served. *See LaGrange and Rollingwood, Texas*,

¹ The transmission services at Douglas are: Station KKTY, Douglas, Wyoming (FIN: 38387); KKTY-FM, Douglas, Wyoming (FIN: 17411), and Non-Commercial Educational Station KDUW(FM), Douglas, Wyoming (FIN: 92622). In addition, White Park is the permittee of Station KBOG(FM), Douglas, Wyoming (FIN: 164286).

10 FCC Red 3337 (1995). Accordingly, the community of Douglas will not be deprived of its only local transmission service and will remain well served if the Counterproposal contained herein is granted.

Bar Nunn is a community for allocation purposes. Bar Nunn is an incorporated community and is therefore a community for allocation purposes. See *Durant, Oklahoma and Tom Bean, Texas*, DA 05-561, released March 4, 2005. Bar Nunn has a population of 936 according to the 2000 Census. It has business, schools, churches and other attributes of a community. See Exhibit 2.

In order to accommodate the community of license change for KTED, from Douglas, Wyoming to Bar Nunn, Wyoming, with the proposed Channel substitution of Channel 251C for Channel 265C2, it is necessary to change the Channel allotment for KGRK, Glenrock, Wyoming, from Channel 252A to Channel 265C1, which allows the use of Channel 251C at Bar Nunn, Wyoming and also provides for improved service to Glenrock, Wyoming. It is also necessary in order to accommodate this Counterproposal to make a proposed change in allotment in Bairoil, Wyoming, from Channel 265A to Channel 253C2, instead of Channel 235A, as proposed by the Commission for the current allocation of Channel 265A. This is in the public interest since it will result in greatly improved service. The current population within the 1 mV/m contour of 265A is only 226 people. Allocation of Channel 253C2 in Bairoil would cover 9,565 people within the 1 mV/m contour, a gain of 9,339 people -- a 40 fold increase in coverage. An engineering study demonstrating that the proposed substitutions comply with the Commission's spacing rules is attached. See Exhibit 1.

The proposed substitution of Channel 265C1 for Channel 252A in Glenrock, Wyoming will also trigger factor four, "other public interest factors," by vastly increasing the number of persons served within the 1mV/m contour of the Station. Operation of Channel 265C1 will

result in a 1.0 mV/m signal coverage of approximately 77,813 persons. This compares to the current coverage of KGRK of approximately 2,941 people, a net gain in service to 74,272 people. The 1.0 mV/m contour for 265C1, completely encompassed the 1.0 mV/m contour of 252A so there is no loss area. See Engineering Statement, Exhibit 1.

Michael and White Park hereby commit to expeditiously filing applications for the respective upgrades they have each requested and, if the applications are granted, to expeditiously construct such facilities. Michael also states its interest in applying for Channel 253C2 in Bairoil, Wyoming and to construct the facilities if it is the successful party in its application or at auction. In summary, W&M request that the following substitutions be made:

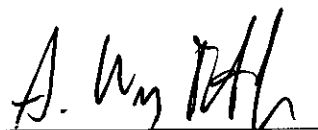

COMMUNITY	PRESENT	PROPOSED
Douglas, WY	223C1, 257A, 265C2	223C1, 257A
Bar Nunn, WY	-----	251C
Bairoil, WY	265A	253C2
Glenrock, WY	252A	265C1
Sinclair, WY	262C	267C

Respectfully submitted,

EXHIBIT 1

**ENGINEERING STATEMENT
SUPPORTING
COUNTERPROPOSAL
WHITE PARK BROADCASTING, INC
MICHAEL RADIO GROUP, LLC**

This Engineering Statement is filed in support of a Counterproposal being filed jointly by White Park Broadcasting, Inc. and Michael Radio Group, L.L.C. ("W&M") in MB Docket 05-177. The Commission, on its own motion, is seeking comments on proposed changes to the Table of Allotments, Section 73.202(b), at Bairoil and Sinclair, Wyoming. The Commission is seeking to change the allotment at Bairoil, WY from channel 265A to channel 235A. It is also seeking to change the allotment at Sinclair, WY from 262C to channel 267C, which does not affect this counterproposal.

White Park Broadcasting, Inc. is the Permittee for a new FM station at Douglas, WY on channel 265C2 , KTED(FM), BNPH-20050103AHH, Facility ID 164285.

Michael Radio Group, L.L.C. is the Permittee for a new FM station at Glenrock, WY on channel 252A, KGRK(FM), BPH-19971010MG., Facility ID 88725.

W&M is seeking to offer a Counterproposal in this proceeding to change the city of license of KTED from Douglas, WY to Bar Nunn, WY. It also is seeking to change channels for KTED from channel 265C2 to channel 251C for use at Bar Nunn. In order to accommodate these changes, W&M is also seeking to change the allotment for KGRK Glenrock, WY from channel 252A to 265C1, this will allow for the use of channel 251C at Bar Nunn, WY by KTED. It will also require that the Commission change the allotment at Bairoil, WY from Channel 265A. The Commission is proposing to allot channel 235A to Bairoil in substitution for channel 265A. W&M is also seeking to

improve the proposed service at Bairoil by proposing to allot channel 253C2 instead of channel 235A as proposed by the Commission.

Figure 1 shows a channel spacing study which shows that channel 251C can be allotted to Bar Nunn at the coordinates of N 42 – 44 – 30, W 106 – 18 – 29. It would require a site restriction of 18 kilometers south of Bar Nunn, Wyoming. It would require KGRK Glenrock, WY to change channels to channel 265C1 as proposed.

Figure 2 shows a channel spacing study which shows that channel 265C1 can be allotted to Glenrock, Wyoming at the coordinates of N 42 – 39 – 43, W 105 – 48 – 58. It would require a site restriction of 23 kilometers south of Glenrock, Wyoming. It would also require that KTED Douglas, WY change channels to channel 251C as proposed, and the Commission change the vacant allotment at Bairoil, WY from channel 265A to channel 253C2 as proposed herein by W&M.

Figure 5 shows a channel spacing study which shows that channel 253C2 can be allotted to Bairoil, WY at the same reference coordinates as the current vacant channel 265A, or N 42 – 14 – 40, W 107 – 33 – 32. .

Figure 3 shows the predicted 60 dbu coverage contours of KGRK, both present and proposed. Since the present 60 dbu coverage of KGRK will be completely encompassed within the proposed 60 dbu coverage, there will not be any loss area. The current population coverage of KGRK is 2,941 persons within the 60 dbu coverage contour. The proposed population coverage of KGRK operating on channel 265C1 will be 77,813 persons within the 60 dbu contour. This will be a gain of 74,872 persons.

Figure 4 shows the predicted 60 dbu coverage contours of KTED, both present and proposed. As can be seen, there will be some loss of 60 dbu coverage area,

however, since KTED is not yet constructed and on the air, there will not be any loss area. The current population coverage of KTED is 74,684 persons within the 60 dbu contour. The proposed population coverage of KTED operating on 251C at Bar Nunn, WY will be 78,081 persons within the 60 dbu contour. This will be a gain of 3,397 persons.

Figure 6 shows the predicted 60 dbu coverage contours of a new station at Bairoil on the present channel 265A operating at maximum facilities. It also shows the proposed 60 dbu coverage contours of a new station operating on channel 253C2 operating at maximum facilities. The current 60 dbu coverage contour would cover only 226 persons. A new class C2 operation on channel 253C2 at Bairoil would cover 9,565 persons within the 60 dbu contour, or a gain of 9,339 persons. W&M certifies that it file an application or participate in any future auction that the Commission may conduct to operate a new station at Bairoil, WY on channel 253C2 if the Commission allots channel 253C2 to Bairoil. The proposed channel of 235A at Bairoil is not available for class C2 operation at Bairoil.

White Park Broadcasting, Inc. is seeking to change the city of license for KTED from Douglas, WY to Bar Nunn, WY. Bar Nunn is currently without local FM service. Bar Nunn has a population of 962 persons. Bar Nunn is located in Natrona County, a county of some 67,336 persons located in central Wyoming. While this would remove the allotment of channel 265C2 at Douglas, WY, Douglas is well served by two other FM allotments, KKTY-FM Douglas operating on channel 257A, facility ID 17411, and KBOG(FM) Douglas a new CP to operate on channel 223C1, facility ID 164286.

Douglas is also served by KKTY(AM) Douglas operating full time on 1470 khz, facility ID 38387 and by KDUW(FM) Douglas operating on channel 219A, facility ID 164286.

In summary, W&M feels that its counterproposal will benefit the Public Interest by providing improved service at Glenrock for KGRK by increasing its class of operation from a class A to a class C1. It will also provide for a new local FM service by KTED at Bar Nunn, Wyoming on channel 251C. While it proposes to delete channel 265C2 at Douglas, WY, it has shown that Douglas, a community of 5,443 persons, will continue to be well served by 1 AM and 2 FM licensed and operating stations, as well as one permitted FM service, to be on the air soon. W&M supports the change in the allotment of channel 265A at Bairoil, WY to channel 253C2. It will provide or a vastly improved service at Bairoil and will also allow for the proposed changes by W&M for KTED and KGRK.

The following is the proposed changes in the FM table of allotments by W&M
Section 73.202(b):

<u>Community</u>	<u>Present</u>	<u>Proposed</u>
Bairoil, WY	265A	253C2
Sinclair, WY	262C	267C
Douglas, WY	223C1, 257A, 265C2	223C1, 257A
Glenrock, WY	252A	265C1
Bar Nunn, WY	-----	251C

W&M, hereby respectfully requests that the commission accept its Counterproposal in MB Docket 05-177. It certifies that, if the proposed changes are adopted, that it will file FCC form 301 minor change applications to operate on the new proposed channels and that it will promptly construct the new facilities.

Respectfully Submitted,
